Design x Space

Hi. My name is Isabella Ouyang. I am an architecture student at Carnegie Mellon University.
This is my website that shows all my design work.

My Work

High Rise Residential

This is an affordable residential housing project in East Liberty, Pittsburgh.

Explore more

Environmental Charter School

This is a design proposal of an Environmental Charter School in Carrick, Pittsburgh.

Explore more

Water Community

This is an residential proposal that aims to change the water problems around Six Mile Island, Pittsburgh.

Explore more

Office Building

This is an office building proposal with the theme of social and spatial porosity in East Liberty, Pittsburgh.

Explore more

Bathhouse

This is a design proposal for a bathhouse in Boston.

Explore more

Agricultural Center

This project aims to revitalize Homewood, Pittsburgh through the design of an agricultural center.

Explore more

Hoop House

This is a design-build project in a team of five that creates a shelter for plants for winters.

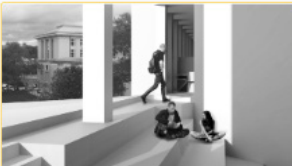

Explore more

Motion

The project aims to use physical wood model to represent motion.

Explore more

Hunt Library Parasite

This project is an extension project of our existing library at CMU.

POROSITY | office building

The theme of this project is porosity. In a macro scale, my project aims to address urban porosity and in a micro scale, my focus is on the porosity of light and space. The study models above show my ideation process. The porosity of light is shown on the facade, and the spatial porosity is formed by the diagonal panels.

RENDERING | Circulation Flow
